Type of Scheme	An open ended dynamic asset allocation fund.																																																															
Investment Objective	The primary objective of the Scheme is to generate capital appreciation by investing in a portfolio of equity or equity linked securities while the secondary objective is to generate income through investments in debt and money market instruments. It also aims to manage risk through active asset allocation.																																																															
Asset Allocation Pattern of the Scheme	Under normal circumstances, the broad investment pattern is as under :																																																															
	Type of Instrument	Normal Allocation (% of total assets)		Risk Profile																																																												
	Equity & equity related securities	65 - 100		Medium to High																																																												
	Debt and money market instruments*	0 - 35		Low to Medium

	<p>Gross equity exposure is maintained between 65% to 100% and the net long equity exposure will be between 30% to 100%. The Scheme may take derivatives positions up to 50% of the net assets of the Scheme, based on the opportunities available, subject to the guidelines issued by SEBI from time to time, and in line with the overall investment objective of the Scheme. These may be taken to hedge or rebalance the portfolio, or to undertake any other strategy as may be permitted under the Regulations from time to time.</p> <p>* Investment in securitized debt will not exceed 10% of the net assets of the Scheme.</p> <p>The Scheme will not invest in foreign securitized debt.</p> <p>The Scheme may engage in stock lending to the extent of 20% of the net assets of the Scheme. The Scheme may undertake repo transactions in corporate debt securities in accordance with the directions issued by SEBI / RBI from time to time and in line with the policy approved by the Board of Directors of the AMC and Trustee Company.</p> <p>The Scheme may invest in Foreign Securities including ADRs/GDRs upto 10% of its net assets subject to maximum of US\$ 600 million in the aggregate at the Mutual Fund level, as per the SEBI circular nos. SEBI/IMD/CIR No.7/104753/07 dated September 26, 2007, SEBI/IMD/CIR no. 2/122577/08 dated April 8, 2008 and SEBI/HO/IMD/DF3/CIR/P/2020/225 dated November 05, 2020.</p> <p>The cumulative gross exposure through equity, debt, derivative positions, REITs and InvTs shall not exceed 100% of the net assets of the Scheme. However, cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.</p> <p>Pending deployment of funds of the scheme in securities in terms of the investment objective, the AMC may park the funds of the scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.</p> <p>The Scheme will invest in debt instruments of investment grade and/or unrated debt securities. "Investment grade" means investment grade by a credit rating agency authorised to carry out such activity under the Regulations. The scheme retains the flexibility to invest across all securities in the debt and money markets as permitted by SEBI / RBI from time to time. In addition to the instruments stated in the above table, the scheme may enter into reverse repos in government securities as may be permitted by SEBI and RBI and in Tri-Party Repo in line with relevant RBI regulations.</p> <p>The scheme does not intend to undertake / invest/engage in Credit Default Swaps (CDS) transactions.</p>																																																															
Investment Strategy	<p>The Scheme has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation. In order to achieve this process, the Scheme will follow a top-down and bottom-up strategy. The top-down process will lead to the active ongoing asset allocation decision between equity and debt and the bottom up process would lead to construction of the portfolio using specific securities.</p> <p>The AMC has built a proprietary model for asset allocation based on the valuations and fundamentals of the companies. The valuation parameters chosen for the asset allocation are PE, P/BV, Dividend yield and the difference of earnings yield and 10 year Government Bond. The rationale behind choosing multiple valuation parameters instead of only PE, is to incorporate the status of the three important financial statements, the P&L, balance sheet and cash flow statement. Different weights have been assigned to different valuation parameters with more emphasis on the balance sheet and cash flow related parameters. The model will be revisited if needed, and adjustments made if needed, to ensure that the outcomes remain relevant to the market environment.</p> <p>Assumptions of the proprietary model</p> <ul style="list-style-type: none"> BSE 200 index was chosen for the calculation of equity returns and for comparing the portfolio returns. 10 year G-sec was chosen for the calculation of debt returns. Valuation parameters were chosen on the trailing 12 months basis. <p>The model would be run on monthly basis to decide the asset allocation. Generally, once the allocation is fixed, it will not be changed till the next month except in case of extraordinary situations where extreme volatility in the markets would force a change in asset allocation.</p> <p>Equity allocation based on the model</p> <p>The gross equity exposure will be maintained in the range of 65% to 100% while the net equity exposure will be maintained between 30% to 100%. The difference between gross and net variation would generally be invested in arbitrage or in arbitrage equity mutual funds. The model would follow the matrix approach for asset allocation based on different parameters.</p> <p>Fixed Income allocation based on the model</p> <p>The exposure to Debt & Money Market Instruments including cash and cash equivalents will be maintained in the range of 0% to 35%. The model would follow the matrix approach for asset allocation based on different parameters.</p> <p>Once the asset allocation has been decided based on the model, the portfolio would be constructed based on top-down as well as bottom-up approach using our core principle of investing, GARP (Growth At a Reasonable Price). The Scheme retains the flexibility to deviate from the asset allocation model, depending on the market conditions, market opportunities, applicable regulations and political and economic factors.</p> <p>An illustration of the asset allocation model :</p> <p>Based on 30% minimum equity allocation</p> <table border="1"> <thead> <tr> <th>Valuation Parameter</th> <th>P/E (x)</th> <th>P/BV (x)</th> <th>Div. 	Investors may note that the above tables are merely illustrative and do not seek to convey that the Scheme would adhere to the equity and fixed income allocations in the scenarios depicted above. The Scheme retains the flexibility to deviate from the asset allocation model, depending on the market conditions, market opportunities, applicable regulations and political and economic factors.																																								
Risk Profile of the scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Scheme specific Risk Factors are summarized below :-</p> <ul style="list-style-type: none"> The Scheme attempts to manage risk through active asset allocation. Based on the historical analysis done by the AMC, such a scheme is able to generate a lower risk profile compared to a 100% equity investment strategy. However, there is no certainty that the active asset allocation approach will be able to manage risk as effectively going forward. The quantitative model is based on the analysis of past performance of fundamental factors, which have relevance to equity and fixed income markets. If the relevance of these factors to influence the respective markets diminishes, it will impact asset allocation and consequently, returns of the Scheme will be impacted. Valuation parameters chosen and the weights assigned are based on the historical analysis and may not hold well in the future if there is extreme change in the perception of the market participants. During periods of extreme volatility in short period of time, the model may underperform the benchmark for short term, however this is likely to average out in the longer term. The Scheme would be rebalanced on a monthly basis. Any sharp volatility in short term may impact the desired asset allocation and hence, the Scheme returns. <p>Please read the SID carefully for details on risk factors before investment.</p>																																								
Risk management strategy	<p>Investment in equity and equity related securities carry various risk such as inability to sell securities, trading volumes & settlement periods, liquidity risk, default risk, reinvestment risk etc. Whilst such risk cannot be eliminated, they may be mitigated by diversification and hedging. Further, the portfolio of a Scheme will be constructed in accordance with the investment restrictions specified under the SEBI (Mutual Fund) Regulations, which would help in mitigating certain risk relating to investment in securities market.</p> <p>Investment in debt securities carries various risk such as inability to sell securities, trading volumes & settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risk cannot be eliminated, they may be mitigated by diversification.</p>																																								
Plans & Options	<p>The Scheme have two Plans : Regular and Direct.</p> <p>Direct Plan is meant for direct investments, i.e. for investors who purchase/subscribe to the units of the Scheme directly with the Fund and is not available for investors who route their investments through a Distributor, while the Regular Plan is meant for investors who route their investments through distributors only.</p> <p>Both Plans have a common portfolio but the Direct Plan has a lower expense ratio on account of absence of brokerage and commission. Hence, both Plans have distinct NAVs.</p> <p>Each of the Plans have the following options:</p> <p>A. Growth Option (default option in case no option specified by investor);</p> <p>B. Dividend Option</p> <p>a. Payout;</p> <p>b. Reinvestment (default sub-option in case no sub-option specified by investor)</p> <p>If the Dividend under the Payout Option is less than or equal to Rs. 200, it will, by default, be reinvested under the Reinvestment sub-option.</p> <p>Dividend Reinvestment sub-option shall not be available to investors who transact through the stock exchange in dematerialized mode.</p> <p>In order to have a uniform disclosure on treatment of applications under "Direct" / "Regular" Plans, the following disclosures are made :</p> <table border="1"> <thead> <tr> <th>Scenario</th> <th>Broker Code mentioned by the investor</th> <th>Plan mentioned by the investor</th> <th>Default Plan to be captured</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Not mentioned</td> <td>Not mentioned</td> <td>Direct Plan</td> </tr> <tr> <td>2</td> <td>Not mentioned</td> <td>Direct</td> <td>Direct Plan</td> </tr> <tr> <td>3</td> <td>Not mentioned</td> <td>Regular</td> <td>Direct Plan</td> </tr> <tr> <td>4</td> <td>Mentioned</td> <td>Direct</td> <td>Direct Plan</td> </tr> <tr> <td>5</td> <td>Direct</td> <td>Not mentioned</td> <td>Direct Plan</td> </tr> <tr> <td>6</td> <td>Direct</td> <td>Regular</td> <td>Direct Plan</td> </tr> <tr> <td>7</td> <td>Mentioned</td> <td>Regular</td> <td>Regular Plan</td> </tr> <tr> <td>8</td> <td>Mentioned</td> <td>Not mentioned</td> <td>Regular Plan</td> </tr> </tbody> </table> <p>In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. Investment Strategy	<p>The key factors of the investment strategy are :</p> <p>The Scheme has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation. In order to achieve this process, the Scheme will follow a topdown and bottom-up strategy. The top-down process will lead to the active ongoing asset allocation decision between equity and debt and the bottom up process would lead to construction of the portfolio using specific securities.</p> <p>The AMC has built a proprietary model for asset allocation based on the valuations and fundamentals of the companies. The valuation parameters chosen for the asset allocation are PE, P/BV, Dividend yield and the difference of earnings yield and 10 year Government Bond. The rationale behind choosing multiple valuation parameters instead of only PE, is to incorporate the status of the three important financial statements, the P&L, balance sheet and cash flow statement. Different weights have been assigned to different valuation parameters with more emphasis on the balance sheet and cash flow related parameters. The model will be revisited if needed, and adjustments made if needed, to ensure that the outcomes remain relevant to the market environment.</p> <p>Assumptions of the proprietary model</p> <ul style="list-style-type: none"> • BSE 200 Index was chosen for the calculation of equity returns and for comparing the portfolio returns. • 10 year G-sec was chosen for the calculation of debt returns. • Valuation parameters were chosen on the trailing 12 months basis. <p>The model would be run on monthly basis to decide the asset allocation. Generally, once the allocation is fixed, it will not be changed till the next month except in case of extraordinary situations where extreme volatility in the markets would force a change in asset allocation.</p> <p>Equity allocation based on the model</p> <p>The gross equity exposure will be maintained in the range of 65% to 90% while the net equity exposure will be maintained between 0% to 50%. The difference between gross and net variation would generally be invested in arbitrage or in arbitrage equity mutual funds. The model would follow the matrix approach for asset allocation based on different parameters.</p> <p>Fixed Income allocation based on the model</p> <p>The exposure to Debt & Money Market Instruments including cash and cash equivalents will be maintained in the range of 10% to 35%. The model would follow the matrix approach for asset allocation based on different parameters. Once the asset allocation has been decided based on the model, the portfolio would be constructed based on top-down as well as bottom-up approach using our core principle of investing, GARP (Growth at a Reasonable Price). The Scheme retains the flexibility to deviate from the asset allocation model, depending on the market conditions, market opportunities, applicable regulations and political and economic factors.</p> <p>For detailed & scheme specific investment strategy, please refer the SID of the scheme.</p>

3. Multiple Bank Accounts Registration Facility and Updation of Bank Accounts :

- The Fund offers its investors the facility to register multiple bank accounts for pay-ins & pay-outs and designate one such registered bank account as "Default Bank Account". Individuals, HUFs and sole proprietary firms can register up to five bank accounts and a non-individual investor can register up to ten bank accounts in a folio. You may avail of this facility by using the "Multiple Bank Accounts Registration Form", available at ISCs and on the website of the AMC, www.barodamf.com. You may update the bank accounts in your account/folio at any time either through the aforesaid Multiple Bank Accounts Registration Form or through a standalone separate Change of Bank Mandate form. You may download the multiple Bank Form from our website www.barodamf.com.
- If no "Default Bank Account" is specified, the AMC reserves the right to designate any of the bank accounts as the "Default Bank Account". Default Bank Account will be used for all redemption payouts, if no other registered bank account is specified in the redemption request for receiving redemption proceeds, or if a new unregistered bank account is specified in the redemption request for receiving redemption proceeds.
- New bank accounts/change of bank mandate can be registered using the Multiple Bank Accounts Registration Form or through a standalone separate Change of Bank Mandate form, as mentioned earlier. - Valid change of bank mandate requests with supporting documents will be processed within ten days of the documents reaching the head office of the Registrar, and any financial transaction request received in the interim will be carried out based on the previously registered details. Please note that a new unregistered bank account specified in any redemption request for receiving redemption proceeds will not be considered.

- Registered bank accounts may also be used for verification of pay-ins (i.e. receiving subscription funds) to ensure that a third-party payment instrument is not used for subscription. Investors (being individuals) applying for Micro SIP registrations are exempt from mandatory requirement of PAN submission. Such set of customers, however, need to complete the necessary KYC requirements, and get a unique reference number from the KRA's system called PAN Exempt KYC Reference No. (PEKRN).

A copy of the KRA issuance letter containing PEKRN should be attached with each application/ transaction.

- In the event of any Application Form being subsequently rejected for mismatch of applicant's PAN details with the details on the website of the Income Tax Department, the investment transaction will be cancelled and the amount may be redeemed at the applicable NAV, subject to levy of exit load, if any. Please contact any of the Investor Service Centres / Registrar / Distributors or visit our website, www.barodamf.com, for further details.

2. KYC :

- To simplify KYC norms and make them more investor friendly and uniform across all intermediaries registered with SEBI, SEBI has recently laid down certain changes in the KYC process. The primary objective behind this is to eliminate duplication of KYC across intermediaries in the securities market. For this purpose, KYC registration is being centralized through KYC Registration Agencies ("KRA") registered with SEBI. Thus, each investor has to undergo a uniform KYC process only once in the securities market and the details would be shared with other intermediaries by the KRAs. CDSL Ventures Ltd. ("CVL"), who was retained by mutual funds for centralized registration and record keeping of KYC records, has obtained SEBI registration as a KRA. Further, SEBI has mandated an In Person Verification ("IPV") of clients to be carried out as part of KYC. IPV shall be a one-time process, and once it is carried out by an intermediary, may be relied upon by other intermediaries also. For mutual funds, IPV may be carried out by the AMC or by the Registrar, or by Know Your Distributor ("KYD") compliant distributors who hold valid certifications issued by the National Institute of Securities Market ("NISM")/ Association of Mutual Funds in India ("AMFI") for their own clients or by Scheduled Commercial Banks (SCB).
- Under the new uniform KYC norms, the following shall be applicable for investing in the Scheme under this KIM :

- For New Investors who are not KYC compliant under the erstwhile or new KYC norms:
 - KYC Application Form to be used, which is attached along with the application.
 - IPV/ Document verification to be done by the Registrar/AMC/KYD compliant distributors/SCBs.
 - Acknowledgement to be issued to the investor to facilitate subsequent investments from the investor.
 - KYC application and necessary documents should either come along with a financial transaction or when the account is opened. This is in line with demat and bank account opening process.
 - For New Investors who have already done their KYC with any other SEBI registered intermediary under the new KYC norms: a. Such KYC compliant investors would not be required to do KYC again.
 - For Existing Investors in the MF Industry: They will not be required to do KYC again.
- Investors who have completed their Centralised KYC (CKYC) and have obtained KYC Identification Number (KIN) from the Central KYC Records Registry (CKYCR), may quote their KIN while investing.
 - KYC compliance with a KRA and enclosing the KYC Acknowledgement along with the Application Form are mandatory for all investors, including individuals, non-individuals, NRIs and channel investors, irrespective of the amount of application/value of transaction. Applicants applying for units through a PoA must ensure that the KYC Acknowledgement of both the issuer of the PoA and the holder of the PoA are enclosed along with the Application Form. The KYC Acknowledgement referred above will be issued by the KRA when an investor submits to the KRA, a KYC application and the prescribed documents. This KYC Acknowledgement is issued by the KRA as a token of having verified the identity and address of the investor(s) and for efficient retrieval of records.
 - KYC status will be validated with the records of the KRA before allotting units. The Fund/AMC will not be held responsible and /or liable for rejection of KYC Form by the KRA. Where it is not possible to verify the KYC compliance status of the investor at the time of allotment of units, the Registrar/AMC/Trustee shall verify the KYC compliance status of the investor within a reasonable time after the allotment of units. In the event of non-compliance of KYC requirements, the Trustee / AMC reserves the right to freeze the folio of the investor(s) and effect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to levy of exit load, if any. In case of an investor applying for CKYC effective February 1, 2017, if there is a mismatch in the name appearing in the CKYC application form and the one mentioned in the Proof of Identity (POI) document, CERSAI will reject the CKYC application. Investors are, therefore, advised to ensure that their names appearing in the CKYC application form and in the POI document are same.
 - Please note that you need to comply with the KYC requirements by submitting requisite documents to the Registrar/AMC/Fund or any SEBI registered KRA and attaching the KYC Acknowledgement with the Application Form. For more information, please log on to www.cvlinia.com / www.amfindia.com, before investing.

Applications are liable to be rejected if KYC requirements are not complied with by all the applicants, and if KYC acknowledgement is not enclosed with the Application Form.

Please note that KYC applicability norms for various investor categories may change anytime in future. Hence, with a view to avoiding rejections, investors are requested to apprise themselves about KYC applicability before submitting their transactions.

The first applicant has to be one of the joint holders of the bank account from which the payment is made via cheque/Funds transfer/RTGS/NEFT. Therefore, please mention the bank account number, bank name & branch address from where the payment is issued and ensure that they match with details on the payment instrument, where applicable.
 - Where the payment instrument does not mention the bank account holder's name(s), please attach bank pass book copy/bank statement (showing the account number, account holder's name and address)/bank letter (mentioning details like bank account number, branch address, account type etc.), with a view to substantiating that the first applicant is one of the joint holders of the bank account concerned.
