Introduction:

Equity oriented schemes offer investors the opportunity to participate in the equity markets while providing diversification, risk management and convenience in their investments. Multicap funds are diversified mutual funds that can invest in companies across market capitalization. In other words, they are market capitalization agnostic and invest across the length & breadth of the equity markets. Thus, such funds are better suited to take advantage of the opportunities present in the markets. These funds invest in diverse stocks across the various sectors and are actively managed so as to outperform the markets.

What is Multi Cap Fund?

- Such funds are actively managed & seek to capture growth opportunities provided by large cap, mid cap and small cap companies with flexibility and discretion to invest in them.
- These funds are able to take advantage of Growth & Value style of investing.
- Such funds are usually better wealth creators than other categories of funds as they can take advantage of investment opportunities across the market.
- On risk-return matrix, Multi-cap Funds are placed higher than Large & Midcap Fund. Hence, if you are willing to take high risk and want to enjoy capital appreciation across market capitalisation segments, a Multi-cap Fund could be appropriate.
